

## **Guidelines for Grant Evaluation**

1. Does the request meet the categorical requirements of one or more provisions for an appropriate Fish and Game Code including, but not limited to, Chapter 2, Sect. 13100 - 13104 and Government Code Title 3, Division 3, Section 29000, et. seq.?
2. Does the request represent an opportunity to provide for a diversity of projects consistent with the public benefit and use of propagation funds?
3. Does the request represent a “sharing” with organizations that may come to the Commission for assistance, thereby representing a broad use of propagation funds in support of Commission constituents and the public benefit?
4. Is the requested expenditure, and award, consistent with the costs associated with the need?
5. Does the award represent equitable financial assistance as provided for similar activities or projects?
6. Does the award represent a single expenditure for a given activity or project, or will it require an additional or continuing encumbrance on propagation funds? If the award would require continued support, how would that encumbrance effect the Commission’s ability to provide for additional and future requests for the use of propagation funds?
7. In what way would an award affect the current and future ability for the Commission to budget for, and continue support for a diversity of requests, consistent with expected revenue to be placed in the propagation fund?
8. Is the awarding of funds fair and equitable to all who seek, or will seek assistance from the Commission, and represent the objective of inclusion rather than exclusion from access to Commission support?
